The 6th Regensburg Rhinoplasty Course

Dear Friends and Colleagues,

Please join us for a world – class training opportunity. Per tradition, the Regensburg Rhinoplasty Course focuses on minimally invasive techniques that benefit patient and surgeon alike. Less tissue dissection, measurable preservation of valuable structures, enhanced recovery and a more benign situation for possible revision procedures.

The program begins with step – by step instructions of all relevant techniques. During live surgery, it is demonstrated how endonasal techniques are incorporated into an existing practice. Case based instructions will allow to understand the indications and execution of advanced techniques, including open approaches, distal graft harvest and grafting techniques.

Join the tradition of 21 courses and over 2.000 attendees since 2009.

Topics of focus will include:
- step – by step instruction of endonasal and open techniques
- minimally invasive techniques
- strategies to enhance recovery
- detailed technical instructions
- case – based interactive training

During a full day of anatomic dissections, you will learn to master approaches and techniques under expert mentoring.

Regensburg is one of Germany's most wonderful medieval towns, relaxing yet vibrant. Travel is easy through Munich airport, and excellent hotels are affordable.

The 5th European Course in Face Lift and Rejuvenation Surgery will take place back to back from April 22nd to the 24th. Benefit from the opportunity of registering for both courses and maximize you learning experience.

Please join us for these unique events
